**Filed:** 02/06/2004  
**Examiner:** Paul M. West  
**For:** Isolated Capacitive Fluid Level Sensor

**Amendment A, revised**

Commissioner of Patents & Trademarks  
Washington, DC 20231

Date: November 8, 2005

Dear Sir:

Thank you very much for your office communication of November 3, 2005, and the information it contained. The amendments have been revised according to your instructions. Please find the revised amendments attached.

Amendments to claims, specification, etc. are now arranged so that each one starts on a separate sheet. "Replacement Sheet" was added to the top of the amended drawing sheets. A listing of the claims is included, with the status added for each claim.

In my last submission of amendment A (which you listed as non-compliant), I had arranged the claim numbers in numerical order so that no numbers were skipped in the amended version. But in your instructions, I saw in the example that the original claim numbers should be retained. Accordingly, this revised amendment A includes the claims with their original numbers, with some being canceled and some amended.

I hope that the amendment is now in proper form.

Also, I have included a check for the extension of time.
